

# KELECHI AWOMS

## Web Developer

Ojo Town, Lagos State, Nigeria | +23408137031311 | [awomskelechi@gmail.com](mailto:awomskelechi@gmail.com) | [Portfolio](#)

---

### SKILLS

- **Front-End:** HTML5, CSS3, JavaScript(ES6+), TypeScript, React.js, Next.js
  - **Back-End:** Node.js, Express.js, PostgreSQL, MongoDB, Prisma
  - **Tools and Libraries:** React Query, Redux Tool Kit, Tailwind CSS, Git, Axios, NPM, React Hook Form, Zustand, MaterialUI, Github
  - **Soft Skills:** Good Communication skills, Critical Thinking, Problem Solving, Team Work and Collaboration, Strong Work Ethic, Flexibility and Adaptability, Time Management Skills
- 

### PROJECTS

**Booktekka – Web Application for Book Recommendation;** TypeScript, Next.js, MongoDB, Prisma, Tailwind CSS, Axios, Next-Cloudinary, React Hook Form, NextAuth.js, Zustand

- Designed and built an application for readers to recommend books to other readers, add recommended books to their library and keep track of their reading progress. The app is currently in production and has a growing number of users
- Included features such as Authentication and Authorization, an Admin dashboard with statistics, CRUD functionality, server side pagination, sort, filter and search functionality, debounce functionality, and image upload.
- Created different api routes for this application using Next.js api routes and utilized SSR for data fetching.

**ECommerce Application;** Javascript, React.js, Redux tool kit, React Query, Axios, React Hook Form, Clerk

- Built the frontend of an ecommerce application for a client and styled every component from scratch with Vanilla CSS on instruction of the client and designed following the specification of a figma template.
- Designed the app to be accessible and responsive across various desktop and mobile screen sizes.
- Utilized Redux tool kit for client side state while server side state was handled with React Query. Clerk was used for authentication.

**Open Source Collaboration – Online Screen Recorder;** Electron, TypeScript, Next.js, Aperture

- Collaborated with other web developers to build an online open source screen recorder.
- Participated in code reviews to ensure adherence to best practices and coding standards.

**Discord Bot;** Node.js, Discord.js, MongoDB, Mongoose

- Designed and wrote a bot to post welcome messages to new users and give users relevant information based on few public commands.
  - Utilized the Discord.js library; an API wrapper, to easily write the bot in Node.js.
  - Utilized MongoDB as the database and Mongoose for object data modelling.
  - Optimized the functionality of the bot to improve the general experience of the members of the discord chat.
- 

### WORK EXPERIENCE

#### Freelance Front-End Developer

2022 - Present

- Design and Building the front-end of new features for various clients as well as integrating data from various back-end services and databases into responsive web app.
- Translating design solutions into high-quality, scalable code and optimizing applications for maximum performance across different web-capable devices and browsers.
- Assisting businesses and companies to establish a strong online presence and effectively communicate their brand to their target audience.

**Freelance Technical writer****2020 - 2022**

- Worked closely with engineers, developers and other subject matter experts to gather information and understand technical concepts.
- Drafted and edited developer manuals, quick start guides, and troubleshooting guides for tech blogs.
- Assisted in translating technical information into language that is easily understandable by end-users.

**Product Marketer - Jumia Nigeria****2017 - 2020**

- Participated in execution of end-to-end marketing strategies for new product launching and collaborated with sales team to gather customer insights and feedback based on market demands.
- Conducted comprehensive market research, competitor analysis, and customer feedback to identify market trends and opportunities for product improvement.
